Musab Saraswat

AI Engineer · Dallas, TX

+1 817 513 4418 · musab.work17@gmail.com · LinkedIn · GitHub · Portfolio

Summary

AI engineer with 1.5+ years shipping AI products for clients: a mobile app in both app stores, a funded healthcare platform, and a voice agent app for a nonprofit's field teams. Builds RAG systems, tool-calling agents, and MCP servers, and backs every change with evals.

Work Experience

Starline Labs (formerly Aigentic Bros) — Dallas, TX

AI Engineer & Founder — *Feb 2025 – Present*

- Built VitalzHub solo in 7 weeks, a healthcare platform that turns lab reports into plain-English health plans for clients in the UAE; the prototype earned stakeholder approval in Dubai and secured funding
- Rebuilt the funded platform with one other engineer on FastAPI, Next.js and AWS, owning the patient app: lab results, progress tracking, and LLM-drafted care plans that doctors sign off before patients see them, with role-based access for 5 user types
- Built rag-motion, a RAG system and MCP server with a 55-question eval set; SQL filters cut limit-breaking answers from 4/13 to 0, and a prompt-injection guard cut a cheaper model from following planted notes 6/12 → 0/12
- Launched AI for Teachers through Aigentic Bros, reaching a 50% visitor-to-customer conversion rate and a 90-member community, and built n8n automations and custom GPTs for clients

Camel Case Labs — Dallas, TX

AI Engineer (Contract, via Starline Labs) — *Feb 2026 – Present*

- Rebuilt BOUTLOOK's mobile app from scratch as the sole engineer and shipped it to the App Store and Google Play through v1.1.1 (11 screens, push notifications, biometric login); the combat sports organization now runs its operations on it
- Built the React Native app for a voice AI agent that lets a nonprofit's field teams log visits by speaking instead of filling out forms, released on Google Play and hardened through 3 weeks of live field testing
- Rebuilt the agent's location matcher, which only scored the first 500 of 922 sites, so every site could match, with confidence thresholds that ask the user to confirm instead of guessing; backed by 27 regression tests
- Fixed live agent failures found in field use, including the agent reporting outreach it never logged and permission gaps that locked out 2 manager roles, and turned those failures into eval cases replayed against production data

Mind Propel — Dallas, TX

Automation & Marketing Lead — *Aug 2024 – May 2025*

- Built automated content pipelines for daily LinkedIn and X posting using AI generation and workflow automation, cutting content production time by 50% while maintaining engagement rates
- Designed scheduled posting systems across multiple channels that held a consistent 7 posts per week with no manual publishing

Education

University of Texas at Arlington — Arlington, TX

B.S. Exercise Science and Kinesiology — *May 2024*

Skills

- **AI Engineering:** RAG (embeddings, pgvector, metadata filtering, hybrid search), AI agents and tool calling, MCP servers, evaluation (eval sets, LLM-as-judge), prompt-injection defenses, structured output, prompt engineering, LangSmith
- **Languages & Backend:** Python, TypeScript, SQL, FastAPI, PostgreSQL, Pydantic, SQLAlchemy, REST APIs, Docker
- **Mobile, Web & Cloud:** React Native (Expo), Next.js, React, Tailwind CSS, AWS (EC2, CloudFront), GitHub Actions, pytest, Playwright
- **Client & Product:** client discovery, MVP scoping, roadmapping, stakeholder management
- **Certifications:** IBM Product Manager Professional Certificate, Google Project Management Professional Certificate
- **Interests:** Travel, basketball league competitor, outdoorsman
